DETAILED ACTION

Double Patenting

Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,685,196. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim essentially the same subject matter, i.e.

A joint seal for use in joints that may be exposed to water comprising at least one layer of compressible impregnated open cell foam,
on at least a portion of the surface of which is positioned a hydrophilic material.

Claim Rejections - 35 USC § 102

The hydrophilic material will partially impregnate the surface of the foam (i.e. the epoxy resin will naturally flow into the open cells of the surface its in contact with).
